Summary

Third-year engineering student with strong problem-solving abilities and experience building end-to-end applications. Focused on developing practical, reliable systems and turning real-world problems into usable solutions. Interested in building scalable and impactful technology.

Education

Sardar Patel Institute of Technology , Mumbai	2023 – Present
Bachelor of Technology	CGPA: 8.0
Shubham Raje Junior College (SRJC) , Mumbai	2023
Higher Secondary Certificate (HSC)	87.86%
Vasant Vihar High School (VVHS) , Mumbai	2021
Secondary School Certificate (SSC)	80.6%

Work Experience

Full-Stack Web Development Intern	Jan 2026 – Mar 2026
<i>Reliance, Jio Platforms Ltd.</i>	

- Built and enhanced internal enterprise web application using React, Node.js, Express, and MongoDB.
- Developed and integrated RESTful backend APIs handling authentication, data flow, and business logic.
- Implemented reusable frontend components and improved UI responsiveness across modules.
- Collaborated with senior engineers in a Git-based workflow, contributing to code reviews, debugging, and feature deployments.

Technical Skills

Programming Languages: Java, C++, Python

Core CS: Data Structures, Algorithms, OOPS, DBMS, OS Basics

Web Technologies: HTML, CSS, JavaScript, React, Node.js, Next.js, Flask, Express

Databases: MongoDB, MySQL, PostgreSQL

Developer Tools: Git, Docker, Linux (Ubuntu), AWS, CLI, VS Code

Projects

StockMaster : <i>React, Node.js, Express, MongoDB, JWT</i>	Demo
---	-------------

- Inventory and warehouse management system for tracking and controlling stock operations.
- Designed secure backend with role-based access and optimized data flow for real-time updates.
- Streamlines stock tracking, transfers, and reporting through centralized dashboards.

AI-Powered Health Monitoring System : <i>React, Node.js, Express, MongoDB, Python, Scikit-learn, ESP32, STM32, MAX30102, JWT, Twilio</i>	Demo
---	-------------

- Real-time health platform capturing vitals from hardware sensors and analyzing trends.
- MERN + embedded systems with AI module for risk prediction, anomaly detection, and alerts.
- Converts continuous health data into insights, alerts, and care recommendations.

CityPulse : <i>Next.js, React, TypeScript, MongoDB, Tailwind CSS, NextAuth.js, Vercel</i>	Demo
--	-------------

- Civic issue management platform enabling citizens to report and track public problems.
- Implements role-based workflows and location-based aggregation for efficient issue handling.
- Enhances transparency and speeds up resolution through real-time status tracking.

Achievements

2x Case Study Finalist and 1x Winner at Kaleidoscope 2025: National-level case study competition winner at Symbiosis Institute of Management Studies (SIMS), Pune.

5x Hackathon Finalist: Finalist in four inter-college hackathons and one obuilding functional software prototypes under tight deadlines.

Top 10 Finalist at IEEE Hackfusion: Ranked Top 10 among 2800+ participants (Top 0.4%) for developing a full-stack web app.
